

# Endovascular Neurosurgery Rotation

**About the rotation:**

Endovascular Neurosurgery-Provide an in-depth exposure to the techniques and interpretation of cerebral and spinal angiography and interventional procedures. The resident would have an opportunity to perform basic angiography skills and assist on more complex cases. The resident would also participate in pre-operative evaluation of the patients to better understand the treatment decision process for endovascular neurosurgery procedures.

**Resident responsibilities:**

Evaluate patients with CNS vascular disorders in clinic setting. Learn basic angiography skills. Assist on endovascular neurosurgery procedures. Monitor and manage post-operative condition of this patient population

**Schedule:**

6 month rotation, primary responsibility during 8-5 weekdays thus still able to perform general neurosurgery resident call
